

BOSCO

The BOSCO is a garden or footpath luminaire. Due to its robust design, it is ideal for public spaces and, for example, camping sites. The fixture is completely constructed from solid chestnut wood. The diameter can vary between 180 and 200 mm. Due to the contemporary and natural appearance, the luminaire is barely visible during the day, but BOSCO comes to life in the dark. With just enough light to functionally illuminate a path or access road.
